Motivation from the candidate

Dear family,

I'm Veronika and I am 21 years old. I have 2 brothers and 1 sister, the youngest one of them is 8 years old. I'm currently studying at the University for a Kindergarten teacher in a way that I can study away from home. I chose this way because I am planning to continue my life in another country with a preference towards the Netherlands.

I have had several jobs as a babysitter/nanny since 2010 with different ages of children ranging from a new born up till 12 years old. At all families there were multiple children. Work was different at each family for example there were families where I had to stay for the whole day, and then there were occasions where I only had to stay for an hour or two. Assignments were different as well, ranging from playing with the kids, helping them with their studies to bringing them to their faculties. There even was a family where I had to put the children to sleep because the parents wouldn't come home till late night.

Our evaluation after the skype interview

We would like to introduce you to Veronika. A Hungarian young woman of 21. She is currently living with her family (2 brothers and 1 sister).

In 2015, Veronika graduated from high school. During this school period, she got a younger sister. This is where her passion for children arose. Veronika loved being around her little sister, taking care of her and spending time together.

After high school, Veronika started a study as pedagogy assistant in Szeged, Hungary. During this year students had to perform all kinds of internships to put their theory into practise.

Veronika started working at a kindergarten for 10 hours per week. She and the teacher would have 25 children with the ages from 2 to 5 years old. Veronika would do the following tasks; playing, drawing, singing, helping the children to go to the toilet, preparing lunches, reading stories before their nap, changing diapers them if needed.

After this experience at the kindergarten, Veronika was send to preschool where she helped out a teacher with approx. 20 children aged 7 years old. She was in charge of physical education; she loves to play sports with children. Besides these lessons Veronika also taught writing and mathematics.

However Veronika didn't finish this pedagogy study as for her it would be an advantage if she would go to do a Bachelor. Therefor she changed to the university of Kecskemét in Hungary. Here she started to become a kindergarten teacher. This study gives her to opportunity to continue studying abroad during the Erasmus project. Veronika wants to continue her study as a kindergarten teacher, but her heart is already in Holland. She first want to settle down and get familiar with the Dutch culture. After a year or two she would like to continue her study in Amsterdam.
